

Year 2005 Projects

Project Name	Activity	Project Description	Habitat Type	Acreage	Linear Miles
Bowman Road River Corridor	Protection/Maintenance	Preserved to protect high ecological value	Forested Wetland	239.00	
Capital of the Coast	Protection/Maintenance	Property is an inholding within / connector to the State Turkey Swamp Wildlife Management Area.	Forested Wetland	30.62	
Capital of the Coast	Protection/Maintenance	Purchase of this 4.13+/- acre unimproved inholding to the Turkey Swamp Wildlife Management Area will remove the inholding and also protect a segment of the Category 1 North Branch of the Metedeconk River. Parcel is landlocked with no deeded public access.	Forested Wetland	4.13	
Cloverdale Road Farm	Protection/Maintenance	Acquire and continue active cranberry and Christmas tree operation	Forested Wetland	80.01	
Freedom Fields Park Connection	Protection/Maintenance	Acquired by the Township and County in order to keep from proposed development	Forest/Woodland	2.15	
Good Luck Point III	Protection/Maintenance	Property is adjacent to county and U.S. Fish and Wildlife Refuge	Forested Wetland	209.00	
Harbor Group	Protection/Maintenance	Adjacent to other state and county owned land, highlighted in the TPL Century Plan as an ecologically important site	Tidal Wetland	783.90	
Jerald Development	Protection/Maintenance	Open Space and Recreation Plan Acquisition	Forest/Woodland	5.75	0.43
Little Egg Harbor Township Donation	Protection/Maintenance	Partner (NJ Green Acres) was not able to provide this information	Freshwater Marsh	10.20	
Louise Lake	Protection/Maintenance	Lake Louise is on Polypod Brook, a tributary of the Metedeconk River, an important drinking water supply in the area. The Metedeconk watershed, a subwatershed of the Barnegat Bay watershed, was the subject of a 2003 TPL study funded by a grant from the EPA. The new public land complements the township's nearby Echo Lake Park, also on Polypod Brook. The hope is to ultimately create a greenway linking the properties	Forest/Woodland	60.22	
Pinelands	Protection/Maintenance	Property is adjacent to Bass River State Forest, and contains habitat for the state-listed endangered timber rattlesnake, and an Atlantic white cedar swamp. The Mill Branch of the Tuckerton Creek, within the Barnegat Bay watershed, runs through the prope	Forested Wetland	802.91	
Pinelands	Enhancement	These wooded Pine Barrens parcels are adjacent to Colliers Mills WMA and are located in the important coastal divide watershed area which is the headwaters to streams flowing to both the Delaware River and the Atlantic Ocean. Their acquisition will provide additional public recreation area as well protecting the WMA from additional residential development.	Forest/Woodland	14.39	
Route 72 Stafford	Protection/Maintenance	Property is substantially impacted by freshwater and coastal wetlands. This property contains the entire natural gradient of plant communities from upland pitch	Tidal Wetland	92.00	

		pine forest to freshwater wetlands fanning to tidal wetlands. This is the first of several contiguous properties currently being reviewed			
Sloop Creek Donation	Protection/Maintenance	Donations were made by owner to Berkeley Township/Ocean County to remain in its natural state	Forested Wetland	5.70	
Tilton Point Inholding	Protection/Maintenance	Property surrounded by the Ocean County Natural Lands Trust Fund Tilton Pt. Property. Acquired to be land to County Tilton Point Land	Tidal Wetland	1.00	
Total				2,340.98	0.43
