

Year 2004 Projects

Project Name	Activity	Project Description	Habitat Type	Acreage	Linear Miles
Delehide Cove	Re-Establishment	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	Estuarine	28.00	
Delehide Cove	Protection	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	Estuarine	29.00	
Delehide Cove	Protection	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	Estuarine	130.00	
Delehide Cove	Protection	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	Estuarine	10.00	
Delehide Cove	Protection	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	Uplands	2.00	
Delehide Cove	Protection	Instatallation of protective geotextile tube breakwater structure to create protected cove for marsh island mound creation and to protect existing wetlands from further erosion.	SAV	1.00	
Dickinson Bay Marsh/Bird Nesting Island, Phase I	Re-Establishment	Restoration of historic colonial waterbird nesting island in Dickinson Bay. The island features upland nesting areas and intertidal wetlands within the island itself, and an oyster reef re-established just offshore from the island.	Estuarine	7.00	
Dickinson Bay Marsh/Bird Nesting Island, Phase I	Re-Establishment	Restoration of historic colonial waterbird nesting island in Dickinson Bay. The island features upland nesting areas and intertidal wetlands within the island itself, and an oyster reef re-established just offshore from the island.	Uplands	3.70	
Dickinson Bay Marsh/Bird Nesting Island, Phase I	Re-Establishment	Restoration of historic colonial waterbird nesting island in Dickinson Bay. The island features upland nesting areas and intertidal wetlands within the island itself, and an oyster reef re-established just offshore from the island.	Estuarine	1.00	
Jumbile Cove Phase II	Re-Establishment	Marsh island mound creation for wetland restoration and to protect existing wetlands, tidal flats, and uplands from further erosion.	Wetland	8.00	
Jumbile Cove Phase II	Protection	Marsh island mound creation for wetland restoration and to protect existing wetlands, tidal flats, and uplands from further erosion.	Wetland	9.90	
Jumbile Cove Phase II	Protection	Marsh island mound creation for wetland restoration and to protect existing wetlands, tidal flats, and uplands from further erosion.	Estuarine	32.00	
Jumbile Cove Phase II	Protection	Marsh island mound creation for wetland restoration and to protect existing wetlands, tidal flats, and uplands from further erosion.	Estuarine	1.00	
Jumbile Cove Phase II	Protection	Marsh island mound creation for wetland restoration and to protect existing wetlands, tidal flats, and uplands from further erosion.	Uplands	1.10	
Total				263.70
