

Year 2005 Projects

Project Name	Activity	Project Description	Habitat Type	Acreage	Linear Miles
Bridge Creek Phase II	Reestablishment	Replaced the Rt. 6A culvert with a 10-foot box culvert to restore tidal flow to a degraded marsh.	Tidal Wetland	16	
Mallard Road	Reestablishment	A new culvert was installed to restore tidal flow, and areas of fill were removed from the marsh surface.	Tidal Wetland	1	
Old Town Hill	Reestablishment	A gravel causeway blocked tidal flow to ~4 acres of upstream salt marsh. The project restored tidal flow by constructing 3 shallow swales across the road to enhance tidal flushing.	Tidal Wetland	4	
Quivett Creek	Reestablishment	Two failing culverts beneath an abandoned road were replaced with one larger concrete culvert to enhance tidal flushing.	Tidal Wetland	11
