

Year 2003 Projects

Project Name	Activity	Project Description	Habitat Type	Acreage	Linear Miles
Anderson Point	Protection	Acquisition of important bluff and shoreform for protection from development and public access	Riparian	72.00	
Bell Creek Wetland Prairie Restoration Project	Protection	Acquisition of wet prairie area for eventual restoration	Wetland	30.00	
Curley Creek Estuary	Protection	Acquisition of undeveloped shoreline to protect from development	Estuarine	20.00	
Dungeness Meadowbrook	Protection	Protects wetlands along Dungeness River corridor from Olympic National Park to Dungeness NWR	Estuarine	278.00	
Dungeness River	Protection	Acquisition of key piece of a riparian corridor between Olympic National Park and Dungeness National Wildlife Refuge	Riparian	400.00	
English Boom	Re-Establishment	Remove dikes impeding tidal influence to estuarine wetlands along West Pass	Estuarine	135.00	
Grandmother's Hill	Protection	Acquisition for protection from industrial development and public access	Riparian	10.45	
Kobayashi Preserve	Protection	Acquisition to protect wildlife corridor and connect with other open space	Riparian	5.30	
Lost continent of Illahee Watershed	Protection	Acquisition of important old growth forest adjacent to stream and existing state park	Riparian	229.00	
Lummi Island	Protection	Acquisition to connect other parcels in a natural area preserve along Rosario Strait	Uplands	295.00	
Misner Woods Acquisition	Protection	Protects important forest from clearing and development in rapidly urbanizing area	Uplands	60.00	
Quimper Wildlife Corridor	Rehabilitation	Acquisition of important wildlife corridor and removal of invasive species	Uplands	7.00	
Red Salmon Slough dike removal	Re-Establishment	Remove old agricultural dike to allow tidal reconnection - fence cows away from river channel	Estuarine	110.00	
Sares Bluff	Protection	Acquisition for protection from development and to expand wetland buffer	Riparian	37.00	
Shine Estuary Restoration	Re-Establishment	Removes culverts and constructs an opening to increase tidal amplitude	Estuarine	77.00	
Skokomish Nalley Island Dike Removal	Re-Establishment	Remove old agricultural dike to allow tidal reconnection	Estuarine	285.00	
Snohomish Wetlands	Protection	Protects existing and restorable estuarine wetlands along tidal reaches of the Snohomish River and its distributaries	Estuarine	1,589.00	
West Milton Riparian Corridor	Protection	Connects existing acquisition and restoration project sites along Hylebos Creek	Riparian	7.00	
Woodway Reserve	Protection	Acquisition of a relatively pristine natural area adjacent to large population center to be used as an outdoor classroom	Wetland	3.60	
Total				3,650.35
